Judgement on Patent Infringement

We are pleased that the Court of Appeal has upheld the judgement of Mr David Stone (sitting as a Deputy High Court Judge) from March 2020, confirming that Fiberweb Geosynthetics Limited, a Berry Global company, have infringed our European Patent (UK) No.2 430 238 B1 with their Terram Hydrotex 2 product

It is important to us to protect our IP investments to ensure that innovative geosynthetic companies are encouraged to introduce new solutions and products.

After 4 years of concern, we look forward to the removal of the infringing products from the market and agreeing damages.

For and on behalf of Geofabrics Limited
